NPIC NOTICE  
NO. 10-35-9SECURITY  
3 May 1967

25X1

## EMERGENCY ALARM SYSTEMS

25X1

1. On 12 May 1967 at 1045 hours the NPIC Safety Officer will conduct a test on both the Fire Alarm System and the Civil Defense Evacuation Horn in order to determine if there are any areas in  where the signals cannot be heard. All employees should remain at their desks during the testing of both systems. Should there be any area where either system cannot be heard that employee should report this information to the Vault Fire Warden. The Fire Wardens for each area will then make a report to the Security Branch regarding the success or failure of the tests in their respective areas.

2. The Fire Alarm Bells will be sounded first at 1045 hours. The test will be as follows: The bells will ring for fifteen seconds followed by a ten second pause which will be followed by a second fifteen seconds of alarm ringing.

3. The Civil Defense Warning Horn will be sounded at 1050 hours after completion of the test on the fire alarm bells. The testing of the horns will be as follows: The horn will sound continuously for fifteen seconds followed by a ten second pause which will be followed by another fifteen seconds of horn sounding.

4. All Area and Vault Fire Wardens are requested to report the results of the two tests to the Security Branch by 1330 hours on 12 May 1967. The cooperation of all building employees is appreciated in this evaluation of our emergency systems.
